Santiago Jiménez Casas

santiago.jimenez.casas@gmail.com +506 8434 9967 jimenezsantiago santin203

Professional Profile

Computer Science graduate from Texas Tech University Costa Rica with experience spanning data engineering, software development, cloud computing, and clinical data programming. Skilled in Python, SQL, R, and SAS, with experience working with structured data, databases, data transformation, statistical programming, and modern cloud technologies. Familiar with clinical data standards and workflows including SDTM, ADaM, TLGs, pharmaverse, and Good Clinical Practice. Strong problem-solving and analytical skills with experience documenting technical processes, collaborating across teams, and learning new technologies quickly.

Experience

Intego Group | *Statistical Programmer* May 2026 – September 2026

- Developed working knowledge of SAS and R for clinical data programming, statistical analysis, and reproducible data workflows.
- Trained in clinical trial data standards and programming workflows, including SDTM, ADaM, and Tables, Listings, and Graphs (TLGs).
- Worked with the pharmaverse ecosystem and R-based tools supporting standardized clinical data analysis and reporting.
- Strengthened data validation, documentation, and quality-control practices while working with structured clinical datasets and statistical programming workflows.

Proexia | *Technical Operations Associate* December 2025 – August 2026

- Structured and designed visual materials and technical presentations for corporate training processes, synthesizing complex information into accessible formats
- Managed the configuration and administration of corporate email accounts and communication tools, ensuring data integrity and seamless organizational connectivity
- Executed the installation, configuration, and maintenance of digital platforms, troubleshooting technical issues to ensure operational continuity and system reliability

Fujitsu | *AWS Developer Intern* January 2023 – June 2023

- Independently developed a scalable internal web application for over 1,000 employees using AWS Amplify, React, and Cognito, significantly enhancing operational efficiency
- Engineered serverless backend solutions using AWS Lambda, DynamoDB, and API Gateway to manage RESTful API integrations and data flow
- Implemented system monitoring and search capabilities using Amazon CloudWatch and OpenSearch to ensure reliability and performance
- Authored comprehensive technical documentation for deployments and testing (CodeCommit), facilitating smooth knowledge transfer and maintenance

Skills

Data Engineering & Analytics: Python, SQL, R, SAS, Pandas, NumPy, Data Transformation, Data Validation, ETL Concepts, Data Analysis
Clinical Data & Statistical Programming: SDTM, ADaM, Tables, Listings & Graphs (TLGs), pharmaverse, Clinical Trials, Good Clinical Practice (GCP), ICH E6(R3)
Software Development: Java, C, C#, C++, TypeScript, JavaScript, React, Next.js, RESTful APIs
Databases & Cloud: PostgreSQL, DynamoDB, Amazon Web Services (AWS), Git, GitHub, Linux
Data Science & AI: Scikit-Learn, TensorFlow, Keras, Jupyter Notebooks, Matplotlib, Seaborn
Certifications: GitHub Foundations, Scrum Fundamentals (SCRUMstudy), Good Clinical Practice (GCP) – ICH E6(R3), Certified in Cybersecurity (ISC^2)
Spoken Languages: Spanish (Native), English (Advanced)

Education

Texas Tech University Costa Rica January 2021 – May 2025
B.S. Computer Science *GPA: 3.86/4.0*

Relevant Coursework

Courses: Object-Oriented Programming, Data Structures & Algorithms, Computer Architecture, Embedded Systems, Discrete Math, Cybersecurity, Probability & Statistics, Artificial Intelligence, Database Systems
Awards: Magna Cum Laude, President's Honor List (x2), Dean's Honor List (x5), Merit-based Scholarship
